Comment: Probably Li-2s.

Comment: Forbably Yek-7s.

Report confirms that the SCHOENVALD: airfield was occupied by PE-2 bombers (training regiment of the III Bur Corps) and by LI-2 transport aircraft. The fighter aircraft, reportedly stationed at the field, must be confirmed by other sources. So far, no fighter unit is assumed to be stationed in SCHOENVALDL. Sighters have possibly been temporarily transferred to the SCHOENVALLE airfield for use as trainers for the training regiment.
